

Berwick Waters, Clyde North, VIC

Berwick Waters is a joint-venture development between Australand Residential and Mondous Property Group, in Melbourne's south-east growth corridor.

The development is designed around 36 ha of wetlands and will have its own Town Centre. The sinuous wetlands are a prominent feature and have inspired the estate's signature steel "ribbon", which will be a design element throughout the estate.

A key aspect of the new community is access to open space and the natural environment, to promote outdoor activity.
